

Stichting RCHF Spring 2013 Newsletter

In 2013 we have continued with ongoing projects as well as starting exciting new projects including the first use with great success of the latest range of Timmy mouse educational books for pre school children in North East Romania. These early learning tools devised by 'Charmant art' in The Netherlands tease the imagination of each child who learns via The Timmy mouse theme books giving them an early start in learning the basics that give them a clear advantage once they move on into mainstream education and allow the child who has difficulties in learning to overcome these difficulties with ease thus raising both personal and children's educational standards for all children.

In this photograph can be seen a kindergarten teacher supervising a class of young children who have just learned to use the Timmy Mouse coloring book

Here a young child is seen in class at kindergarten with his copy of the Timmy mouse first steps in education book.
