Timmy Mouse Educational Project 2017 updated news.

The Timmie Mouse education started in the fall off 2014 and today brings weekly benefits to thousands of Romanian children in Suceava County along with a number of children in Botosani County too not forgetting children who are hospitalized in Iasi County at the pediatric TB hospital section and at the hospital Marius Nasta in Bucharest also.
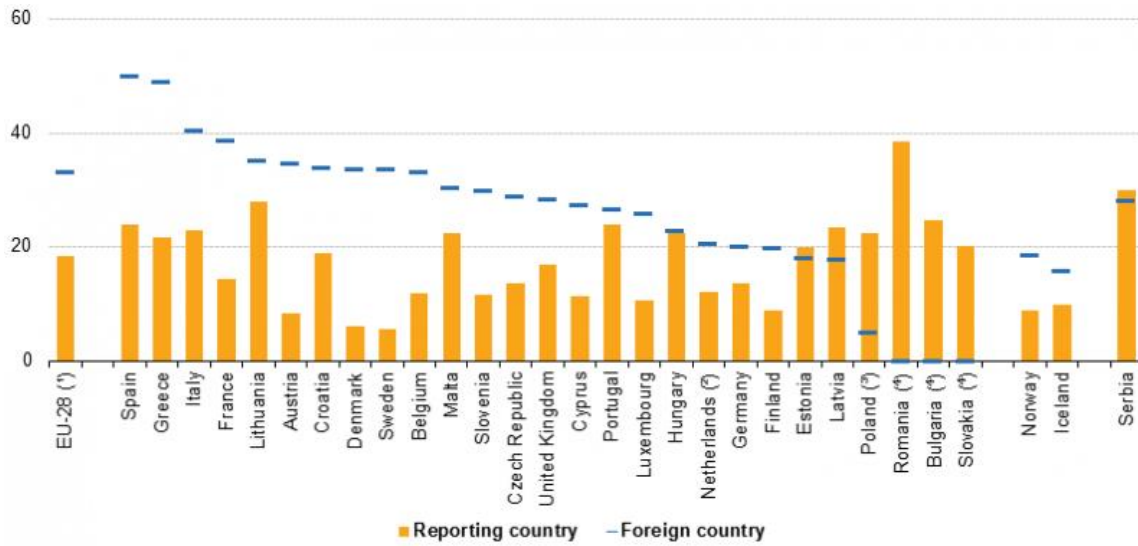

The educational timmie range of early learning books and learning cards provide education provide easy and enjoyable lessons that allow all children a perfect start to learning the most important basics at the earliest age and allow even the child who is falling behind a real chance to catch up and go forward along with their colleges to attain the same high standard at a young age.

Weekly Stichting Romanian Children's humanitarian foundation representatives are out helping in kindergartens and schools in northeast Romania in educational classes with children. Delivering the latest Timmie products and providing teacher training along the way.

An early start to education is only good if the best learning materials are available to all children and here the thanks go to Miriam Charmant who is the creator of the Timmie educational products which are wonderfully animated by her superb artistic skills. The Mouse family as in

the whole of the Timmie mouse educational range is now after 3 full years and thousands of children using this learning method also a well recognized sign of the mouse!

St RCHF is aided in this long term project to benefit children's education by the Suceava Police Inspectorate who we have collaborated with for many years in activities that benefit children including children's crime prevention issues.

(⁴) Foreign country: low reliability, not available.

In the latest available EU Statistics on children at risk of poverty Romania has by far the highest number of children living in poverty. We visit families in rural areas that live in small hamlets of old dwellings with no modern amenities as items like a electric cooker, fridge, freezer, shower unit with boiler, vacuum cleaner or television simply cannot be of any use as these marginalized families have no mains services that we all take for granted like piped water, gas and electricity.

If we are to make changes that allow a future for all children including all the marginalized ones and there are many, then the best start is to provide the means for a top class early education catering for age ranges 4 – 7 years old and this is were Timmie mouse products really come into their own and make a difference! Kindergarten and school directors are full of praise for the products that allow them to assure a better standard of early education for their children and with this advantage the children are then far better prepared when they enter primary educational years.

If poverty is to be overcome, then a high standard of education must be made available to every child no matter what status of family they live in. This will provide the best future opportunities in years ahead and the very probable possibility that these children will on leaving education have gained a diploma that will allow them a career that we hope will life them out of the poverty bracket they were born into.

We are dependent 100% on public donations. We receive no donations from the Romanian authorities. 100% of all donations are spent solely on Timmie Mouse children's school materials.

Please contact us if you would like to make a donation.

St. RCHF (Stichting Romanian Children's Humanitarian Foundation) is ANBI (Docnr: 58253) accepted by the Dutch tax office (NL). since the 1st of January 2008.
