

RCHF PRODUCTS

Within RCHF we work on traditional values and place a great emphasis on public health education as no matter what social status a family has or ethnic background all members of the family including children deserve a chance to learn and obtain a full education. After many years working in this domain RCHF consulted Charmant Art in The Netherlands to come up with new ideas and here the Mr Mouse characters were born! RCHF also produces its own products in the form of educational materials including brochures, leaflets, posters and promotional aids including tee shorts. All of the RCHF products are not for commercial sale and are given free of all charges. The products are the sole property of RCHF and you are freely available for use by contacting stichting_rchf@yahoo.com

Students above learn about Tuberculosis by participating in the RCHF interactive board game lesson. This valuable learning tool is now available in Romanian, French, English, Serbian & Russian languages.

Also above you can see kindergarten children thrilled with their RCHF freely given tee shirts complete with the Mr. Mouse logo adopted by RCHF within the last 3 years. By introducing children at kindergarten age to Mr Mouse they then at a later stage after progressing into mainstream school are acquainted with Mr Mouse and can move onto RCHF educational products.

Mr. Mouse animated RCHF basic Hygiene book

A lack of basic hygiene is the basis for illness and disease, thus it's an important subject for young people to learn especially in developing Countries.

RCHF therefore in collaboration with Charmant Art designed a first class learning tool for children in the form of an animated Hygiene book to help children learn this vitally important subject at an early age.

The RCHF hygiene book is available in Romanian, English and is soon to be available in Serbian language also.

The text is in the simplest of terms so that young children also aided by the illustrations can understand as they learn with ease. The book is given free to children at the end of their lesson to take home and recap on, plus show other family members too, thus increasing the scope within the family for learning about best hygiene practices!

All of the illustrations for the book were produced free of charge by Charmant Art.

There is also a varied range of RCHF designed health educational material on a range of important subjects including Tuberculosis, HIV virus, Hepatitis, Healthy lifestyles, Alcoholism, No Smoking, Violence within the family home, plus on the subject of illegal drugs.

In 2011 an all new Anti drug book for adolescent teenagers will be available followed by an animated book on the same subject for younger children.

**Be strong and just say
NO to narcotics**

Essential reading for young
people today.

Education about harmful substances and illegal drugs is a vital part of public health education for all age groups today.

The cover seen on the left is the basis of a new book to teach children about the dangers of solvent abuse, weed shop hallucinating products and illegal drugs in an effort by RCHF to raise awareness in a positive manner about the harmful effects of all types of narcotics.

These valuable copy-written books will be available initially in both Romanian and English in 2011 and will be followed up in other languages later in the year.

For further information on how you can obtain a copy please contact stichting_rchf@yahoo.com

Narcotic prevention brochures are also available on request.

A full set of TB animated prevention cards are also available to be used in group sessions to aid students to understand about Tuberculosis and how to prevent TB.

Within RCHF we believe that children love to learn and learn easier if their lesson is both interesting and interactive!
