**Conferinta pe tema problemei “etnobotanicelor” si Anti-  
Drog workshop-uri Interactive pentru tineri**

**Locatie; Scoala “Vasile Lupu” IASI 30 Mai 2011**

## Not all Leaves are good ones! – No toate frunzele sunt bune!

Following up on the Botosai County RCHF anti drug conference and workshop RCHF quickly promoted a similar conference & workshop for young people also in Iasi City – the second largest City in Romania and one with a distinct problem of drug abuse amongst young people with the availability of ‘etnobotanice’ – weed shop hallucinating substances that have become available over the past 3 years within the City especially amongst the cities huge student population. Just 2 days ago **another 6 young students were admitted to the city hospital** after consuming these deadly drugs that are promoted as safe or easy drugs within society but are anything but safe or easy on the user – several of whom have died from drug abuse recently and thousands more who have become addicts.

Etnobotanice drugs are sold openly in Romania which is now the fourth largest user in Europe today. These products cleverly marketed as aromatherapy and herbal plants leaves and substances have fooled many an innocent young person and have with their special properties quickly seen the first time user become addicted. Blood samples taken from consumers when rushed to the City Emergency Hospital in a grave condition with doctors fighting for to save their lives prove by analysis that these are dangerous drugs as **contain a mix of heroin, cocaine and cannabis** and are not simple herbal remedies. The products actually state in many cases “Not for human consumption” but the non English speaking Romanian population simply does not understand this and the shop owner provides no translation, in fact they tell young people they are safe to use as are legal. These Etnobotanice weed shop drugs are such a problem to Romanian young people that RCHF decided to produce the Iasi 2011 anti drug conference in collaboration with **Dr Tudor Ciuhodaru** the Iasi emergency Hospital specialist doctor who is a toxicologist also and Romanian deputat in Parliament

Students at the RCHF 2011 Anti drug conference and workshop

# RCHF has further conference and workshop venues

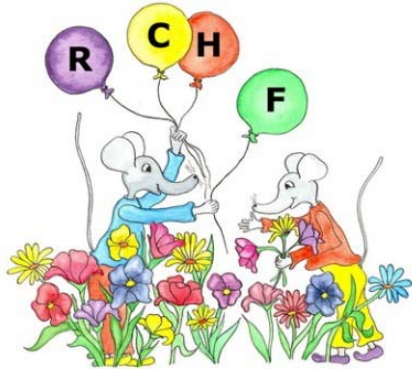

Young people who participate in the RCHF Anti Drug conferences and workshops gain practical as well as theoretic knowledge of the subject.

Students participate in the event full of enthusiasm and leave after the event with a new gained knowledge of the reality of the dangers of drugs.

They know **now** that **ALL** drugs are dangerous!

**RCHF in collaboration with EAD, EURAD and Drug Free Scotland is now planning further Anti Drug conferences in Suceava County, Neamt County and also in The Republic of Moldova in the capital City of Chisinau.**
